TechNova Security Incident Response Policy

Document ID: DOC-SEC-001

Classification: CONFIDENTIAL

Department: Security

Owner: Security Operations

Purpose

This policy defines the process for identifying, containing, investigating, and resolving security incidents.

Incident Escalation

High-severity incidents must be escalated to the Security Administrator immediately.

Authentication Anomalies

Authentication anomalies involving repeated login failures must be investigated by the Security Operations team.

Privileged Access

Privileged access anomalies require investigation and must be reviewed by an authorized security administrator.

Data Classification

Security incident records are classified as CONFIDENTIAL.
